

SSGA welcomes new director – Charlotte Greenshields

At the January 13, 2022 Annual Meeting, the Saskatchewan Seed Growers' Association welcomed Charlotte Greenshields as a new director to its Board.

As part of a family operation (in the Semans area) that has been involved in pedigreed seed production for over 40 years, Charlotte looks forward to becoming more involved in the pedigreed seed industry at a different level.

Charlotte attended the University of Saskatchewan and spent summers inspecting pedigreed seed crops with CFIA. As a Professional Agrologist, she has worked in the agricultural industry for a number of years, currently as Pedigreed Seed Territory Manager with Canterra Seeds.

Charlotte is an active volunteer with many non-profit charities and sees this new role as Director with SSGA as opportunity to contribute to her pedigreed seed community.

Welcome Charlotte!
